No. 32-75

TITLE/SIGNIFICANCE:

Suspect SA-5 Launch Areas Under Construction at Kapustin Yar SAM Firing Range

COMMENT: Five new type suspect SA-5 launch areas may be under development at the Kapustin Yar SAM Firing Range. These suspect launch areas were previously reported as unidentified areas (Ref. IEG PI Notice #18/75). [redacted] a box-^{25X1} structure had been constructed within [redacted] excavation at area four. The structure compares favorably with the box-like structures seen at SA-5 launch positions, on which the launcher is emplaced. Long axis azimuths of each area intersect at the R&D launch area where only SA-5 related radars are located.
